

## **Sylvia E. Rosas, M.D., M.S.C.E.**

Assistant Professor of Medicine  
Renal-Electrolyte and Hypertension Division  
University of Pennsylvania

### ***Research Interests***

My primary research focus is cardiovascular disease in patients with chronic kidney disease or on renal replacement therapy (dialysis or transplantation), including novel risk factors (e.g., homocysteine, Lp(a), C-reactive protein) and noninvasive cardiovascular procedures to identify high-risk individuals. I have also contributed to research on erectile dysfunction, another frequent complication in dialysis subjects.
